

# Label+

## You CAN print your own barcodes!

Imagine the convenience, no supply delays and large minimum orders, barcode labels of what you want, when you want them. Perhaps you want to try substituting a simple barcode scan for repetitive keystrokes; no problem, from idea to testing in a couple of minutes!

Label+ for Windows holds the key. Simple to use, Label+ and pre-cut label sheets turn your PC and its laser printer into a barcode label printing system. Just choose the label size to be used, the text to be printed above your label, and the range of labels required, and you'll have your labels in minutes not weeks.

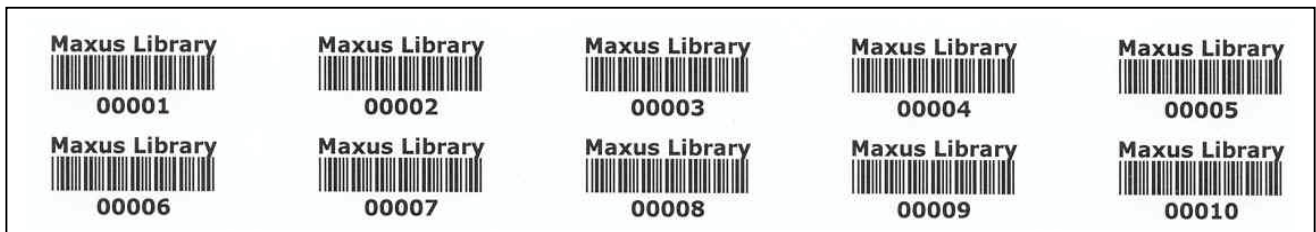

You can also pass data files to Label+, or with the new 32 bit Version 2.3c, use the internal database for storing and selecting labels you have used in the past, a great convenience!

Label stock is A4 size, with 90, 64, and 44 labels per sheet in durable paper, and 90 labels in plastic. All labels are pre-cut so that although they hang on tight while they are being printed, they are easy to detach once printed. Label+ can start printing at any location on a sheet, so partly used sheets don't get wasted.

Label+ prints:

- Code 39
- Code 128
- Code 93
- UPC/EAN
- Codabar
- Interleaved 2 of 5
- EAN-128, ITF-14.

## Preprinted Barcode Labels

Maxus can supply preprinted barcode labels according to your specifications in a range of sizes. Fixed or variable text can be printed above and below the actual barcode. You can specify a range of numbers to be printed, plus a fixed prefix or suffix, or you can supply an ASCII file of data to be printed on each label. (Contact Maxus for details of how to prepare this file from your Inmagic database.)

During the printing process a plastic coating is fused onto the printed barcodes. These labels are expected to withstand approximately 1,000 scans before becoming unreadable. The labels are also moisture resistant though not waterproof.

Labels are available in the following sizes:

Number per sheet	Size of label in mm
44	48 x 25
64	50 x 17
90	40 x 15

Prices for preprinted labels are based on a cost per sheet, therefore the cost per label will depend on the size of label chosen. Using sheets of 90 labels the cost per label is about 3c, for 64 labels per sheet the cost is about 4.5c.

When ordering labels you will need to specify:

- The label size
- The number sequence required.

Optionally you can also specify:

- One or two lines of text to be printed above the labels
- One line of text to be printed below the label
- A prefix or suffix
